

Fuel Retail Platform Architecture Blueprint

Whitepaper - 15 min read

A reference architecture for billing, shifts, wet-stock, credit, reconciliation, and offline continuity.

1. Operational domain boundaries

Use this section to evaluate operational domain boundaries, including operational constraints, architecture boundaries, evidence, ownership, and failure handling.

2. Forecourt billing continuity

Use this section to evaluate forecourt billing continuity, including operational constraints, architecture boundaries, evidence, ownership, and failure handling.

3. Shift and stock reconciliation

Use this section to evaluate shift and stock reconciliation, including operational constraints, architecture boundaries, evidence, ownership, and failure handling.

4. Audit evidence

Use this section to evaluate audit evidence, including operational constraints, architecture boundaries, evidence, ownership, and failure handling.

5. Deployment and support model

Use this section to evaluate deployment and support model, including operational constraints, architecture boundaries, evidence, ownership, and failure handling.
